

# JOINTWORKS Network for Employability and Training

Invitation to participate in research supporting the ageing workforce with long-term muscle and joint pain.

## Are you a healthcare professional who:

- Has experience in working in an occupational health service or supports the wellbeing of employees at a work setting?
- Is keen to share their insights on how to best support the workforce with chronic musculoskeletal disorders (CMSDs) and other comorbidities?
- Has worked also with the ageing workforce and understands their unique health challenges?

## Why contribute to our research?

- Collaborate with a multidisciplinary team to create effective workplace interventions.
- Share your expertise, contribute to research and strategies that can make a real difference.
- Play a pivotal role in bridging the gap between healthcare and the workplace.
- Enhance patient outcomes by ensuring they receive the right support in their work environment.

## Specific:

- We will invite you to attend a 2-hour online workshop with various OH healthcare professionals.
- You will be also invited to attend a half-day face-to-face workshop in Birmingham collaborating with the other stakeholder groups (Employees over 50 with CMSDs, Researchers, Policy Managers, Managers/Employers)
